Mission

## Mission statement

> We support our customers in their digital transformation so they can navigate change successfully.

# Foundation

Sourcing International was founded in 2017 by Oliver Lindlbauer and Tobias Höllwarth with the aim of overcoming entrenched patterns of thinking and developing better, faster, and more effective solutions to the great digitalisation challenges of our time.

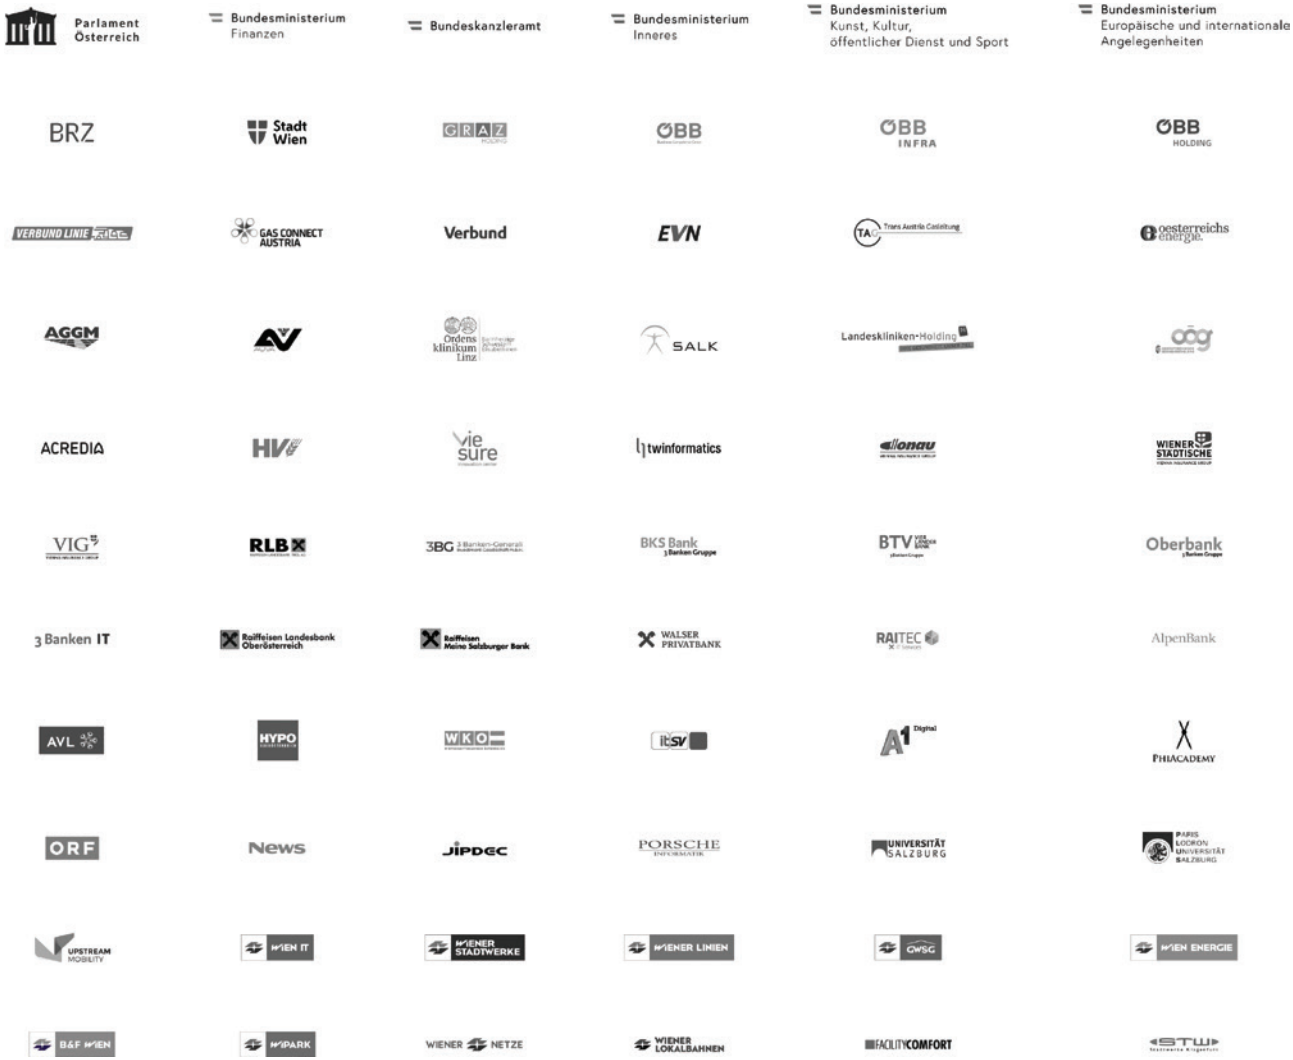

# Company name

The company name was selected based on the realisation that organisations in the digital world of tomorrow will be reliant on significantly more complex sourcing relationships. The choice of the term “International” emphasizes both the global connectivity that the company brings and the fact that national borders are increasingly blurring in the digital era.

## Vision statement

> For our clients, we want to be the most trustworthy partner, making essential contributions to their mission-critical projects.

SERVICE AREA 1

# Strategy, Governance & Compliance

**Defining the right framework**

We advise and support our clients in the development of strategies for utilising new technologies effectively and in compliance with regulations.

We create suitable target images, reduce frictional losses with transparent and clearly defined processes, and minimise risks through suitable governance and compliance requirements. In this way, we accelerate the implementation of our clients' strategies.

SI

SERVICE AREA 2

# Digital Transformation

**Managing key projects**

Together with our clients, we implement projects that are critical to success and support them in their digital transformation. In doing so, we assume responsibility, contribute comprehensive expertise, and act with integrative sensibility.

We provide support in the selection of methods and processes that ensure transparent and goal-oriented project management. We lead projects to success through effective stakeholder management and full team commitment.

SERVICE AREA 3

# Application

**Implementing technology projects**

We are experts in requirements and implementation management, software development, and design. With sound specialist knowledge and high quality standards, we successfully complete even the most demanding technology projects and integrate solutions seamlessly into existing structures.

By focusing on the specific requirements and objectives of each project, we ensure efficient and smooth implementation.

SERVICE AREA 4

# Organisational Identification

**Multiplying success**

We demonstrate how people in IT structures can achieve high commitment and sustainable results. With our tried-and-tested method, we support people in adopting an entrepreneurial attitude, taking responsibility within their organisation, and growing personally in the process.

We assist our customers in developing a vibrant organisational culture and sustainably increasing the productivity of their teams. We place particular emphasis on promoting cross-departmental collaboration and increasing satisfaction at all levels.
